

CAPABILITY

STATEMENT

HISTORY - WORKING HARD SINCE 1948

FTS was founded in 1948 by Bernard Patton, inventor of the fluorescent tube rejuvenating machine, setting the foundation for 75+ years of technical expertise. In 1952, Dorothy Patton became one of the first women to lead in the energy and lighting sector, shaping a legacy of our service today. Now, led by third-generation President & CEO Michele Davidson, FTS is a women-owned distributor providing products & turnkey solutions in energy-efficient lighting, recycling, and EV charging. We have helped businesses nationwide reduce costs, ensure compliance, and enhance sustainability.

OUR PRESIDENT & CEO

Michele Davidson is the third-generation leader of FTS Lighting, Recycling & Energy Solutions.

She honors the legacy while transforming FTS into a forward-thinking, sustainability-driven solutions provider. Recognized as a respected voice in the industry, Michele serves on the Board of Directors of Sustain Southern California, is a past Chair and current Ambassador for WBENC, and an active leader within multiple business- and energy-focused organizations.

Supported by the FTS A-Team, Michele continues the mission to guide clients toward a cleaner, smarter, more efficient future. Our combined expertise and shared values drive everything FTS delivers
